

SAKE

“THE DRINK OF THE GODS”

RICE

High quality and carefully farmed rice is expensive, but worth it.

Premium sake is made from rice specifically bred for sake. It isn't made from table rice. Great sake uses high quality rice grown in high quality fields. A great sake brewery will keep a close relationship with their local farmers to find the best rice grown in the region.

POLISHING

The best sake is made only from the heart of the rice grain.

The outer layer of sake rice contains protein and fatty acids that produce harsh flavor.

To make great sake the brewer must polish away the outer layers.

The state of the art machine needed to polish rice to ultra premium levels without breaking the grains costs over one million dollars.

ATTENTION

Hand crafted, labor intensive techniques lead to better sake.

Many steps of modern mass-produced sake are done by machines following a procedure. This hands-off approach loses the careful oversight of a great Toji (Master Brewer). Only a diligent and talented Toji is able to make the small adjustments needed at every step to produce the best sake every time.

HONJOZO

Rice polished to at least 70%. A small amount of distilled alcohol is added to the rice mash. This is added to extract aromas and flavor compounds that do not dissolve in water. These compounds would otherwise be removed during the filtering process. Honjozo's are light and easy to drink.

JUNMAI

Rice polished to at least 70%. Made with only rice, water, yeast and koji. Junmai typically are fuller bodied and richer than other types often with good acidity. Junmai paired with a higher grade means that the rice is polished to that level AND was made with only rice, water, yeast and koji.

GINJO

Rice polished to at least 60%. Brewed with labor intensive steps. Fermented at colder temperatures for longer periods. Ginjos are quite fragrant, with rich fruit flavors.

DAIGINJO

Rice polished to at least 50%. The pinnacle of the sake brewer's art. Brewed with painstaking precision. Daiginjos are generally delicate with complex flavors and aromas. They are the smoothest of all sake.

NIGORI

Cloudy. Coarsely filtered to allow rice particles to remain in sake to increase texture and flavor.

NAMA

Unpasteurized. fresh, fuller flavored, lively

GENSHU

Undiluted, cask strength. Higher alcohol content

TOKUBETSU

Special. A Sake that the brew master has designated as special. Made with extra attention.
